

A large iceberg floating in a blue ocean. The tip of the iceberg, which is visible above the water, is relatively small and jagged. The vast majority of the iceberg is submerged below the water line, appearing much larger and more complex in shape. The water is a deep blue, and the sky above is a lighter blue with some wispy clouds. The overall image serves as a metaphor for the book's theme of natural wonders that are often unseen or underappreciated.

Resumo de 1001 Natural Wonders You Must See Before You Die

Updated and enhanced with new descriptions of natural wonders selected by UNESCO (The United Nations Educational, Scientific and Cultural Organization) as World Heritage sites, this beautiful volume takes readers to the most spectacular places on Earth--sights and locations so breathtaking that once seen, they are never forgotten.

Among them are: The iconic rocks and pinnacles of the Arizona desert The frozen, majestic Scandinavian archipelagos The secluded Spanish wetlands, home to the world's few remaining Iberian lynx The fragile reefs of Australia's coastline, now threatened by global warming Written and compiled by a team of the world's most well-traveled writers, ecologists, photographers, and conservationists, "1001 Natural Wonders " circumnavigates the globe, traveling to the most outstanding locations our planet has to offer.

Readers will take an armchair tour augmented by the explosive rumbling of Caribbean volcanoes, and visit places like Bryce Canyon, Utah, a rugged, dramatic national park located just a few hours' drive from Salt Lake City.

Packed with information on the creation, development, and location of each natural wonder, and describing protected areas and endangered species in detail, this comprehensive guide offers compelling insight into our planet's priceless resources.

It celebrates hundreds of millions of years of the Earth's turbulent natural history and displays our planet's beauty, which is our unique heritage. Hundreds of magnificent color photos.
