Coincidences,

Chaos, and All

That Math Jazz

MAKING LIGHT OF WEIGHTY IDEAS

"I once had a math teacher who used to throw books at us. If only this had been one of them." —Ben Longstaff, *New Scientist*

Resumo de Coincidences, Chaos, and All That Math Jazz: Making Light of Weighty Ideas

A book for the eternally curious, *Coincidences* fuses a professor's understanding of the hidden mathematical skeleton of the universe with the sensibility of a stand-up comedian, making life's big questions accessible and compelling.

Each chapter opens with a surprising insight not a mathematic formula, but a common observation. From there, the authors leapfrog over math and anecdote toward profound ideas about nature, art, and music.

Coincidences is a book for lovers of puzzles and posers of outlandish questions, lapsed math aficionados and the formula-phobic alike."
