# Resumo de Ear-Splitting Sounds and Other Vile Noises

They say that in space no one can hear you scream... and its true! In the emptiness of space, nothing makes a noise. But on Earth... our ears are constantly pounded by sounds.

Learn all about the most disgusting and dreadful aspects of sound. From flatulent whoopee cushions to glass-smashing opera singers and music-loving pigs, this book is full of yucky, painful and fascinating facts.

You can get your ears tuned into some easy (and painless!) experiments, too.
