Interrogation: Science and Art

Foundations for the Future

Intelligence Science Board

Phase 1 Report

NATIONAL DEFENSE INTELLIGENCE COLLEGE

# Resumo de Educating Information: Interrogation: Science and Art - Foundations for the Future

This compilation of articles on interrogation methods and their efficacy comprises the first phase of a larger project sponsored by the Intelligence Science Board, which was chartered in 2002 to advise senior intelligence officials on scientific and technical issues of importance to the Intelligence Community.

Robert A. Fein, a member of the Science Board, chaired the effort by what appears to have been a truly high-powered team. Eleven individuals with security and counterintelligence experience served on his "experts committee," drawn chiefly from the Federal Bureau of Investigation and military intelligence units.

The project also enlisted an outside advisory group, made up of three Harvard University professors (including the distinguished historian and intelligence scholar Ernest May), two college presidents, a scientist with the Nuclear Threat Initiative, and a Goldman Sachs vice president.

The dozen authors of these articles include forensic psychologists; a policy analyst; lawyers; a "neuroscience thrust lead" (whatever that is); a computer scientist; intelligence officers; a psychiatrist; experts in negotiation practices; and engineers.

Several have been or are affiliated with the MITRE Corporation.
