Resumo de The Scent of Salt & Sand: An Escaped Novella

In *Amber Smoke* and *Scarlet Rain*, acclaimed bestselling author Kristin Cast built a world in which the walls that separate Tartarus from the mortal realm have been breached, releasing every variety of evil into the world.

In this novella, she sends her fans on a separate journey, one that will meet up with the rest of *The Escaped* series as it continues on its spellbinding journey.

The Sirens aren't evil by nature. Their song lures men in, and only by trying to procreate and continue their species do they reveal their true, monstrous nature. When some Sirens escape to the mortal realm, they hide out in San Francisco, blending in as best as they can.

They are on a mission: to find the ideal partner to mate with. Melody is on the hunt, and when she meets Dean, she sees a target who will allow her to fulfill her purpose.

What she doesn't count on is falling in love a love that could destroy them both. The romance and the tension heat up as Kristin and P.C. Cast, co-authors of the *House of Night* series, bring in the characters from *The Escaped* to this new story, raising the stakes for the mortal realm to a fever pitch.
