# Resumo de We Were Here: A New Adult Prequel to Geoducks Are for Lovers

In the 90s ... texting involved paper and a pen ... our selfies were Polaroids ... our favorite music was on mix tapes. Sex was dangerous, music was raw, and falling in love felt nostalgic.

We were friends and lovers. We thought we knew everything. We knew nothing. We were here. This is the story of seven college friends, falling in and out of love, and discovering who they are.

Set in the early 1990s, a time before the internet, social media, and smart phones, We Were Here is the prequel to Geoducks Are For Lovers. It can be read as a standalone New Adult romance.
